

Backend Developer

Raja Pandeeswaran S

Professional summary

I am a Backend Developer (software developer) who specializes in building and maintaining the server-side logic and infrastructure of web applications. I work on the "back end" of an application, which refers to the server, database, and other components that handle data processing, storage, and retrieval.

Experience

Backend Developer

September 2022 - Now

RAMSOL / India, Chennai

At RAMSOL, I worked as a Backend Developer . During this period, I was responsible for developing robust backend solutions and services for the company's website and applications. My main responsibilities included:

- Developing Server-Side Logic
- API Development
- Database Design and Management
- Integration with External Systems
- Performance Optimization
- Security and Data Protection
- Testing and Debugging
- Collaboration and Version Control
- Monitoring and Maintenance
- Keeping Up with Technology Trends
